Advisory Business

Firm Description

The financial advisory practice of MICHAEL PACE, CFP® was founded in 1988.

MICHAEL PACE, CFP® offers personalized confidential financial planning and investment management to individual clients and families. Advice is offered through consultation with the client and may include: assessing a client's assets and liabilities, income and expenses, risk tolerance, tax exposure, and estate planning needs.

The financial planning process involves a review of a client's personal financial needs and goals for the future, with the objective of creating and implementing a financial plan designed to help each client achieve their financial goals.

MICHAEL PACE, CFP® is strictly a fee-only financial planner and investment manager. He does not sell annuities, insurance, stocks, bonds, mutual funds, limited partnerships, or other commissioned products. He is not affiliated with entities that sell financial products or securities. No commissions in any form are accepted. No finder's fees are accepted.

Investment advice is offered, with the client making the final decision on investment selection. MICHAEL PACE, CFP® does not act as a custodian of client assets. The client always maintains asset control. MICHAEL PACE, CFP® places trades for clients under a limited power of attorney.

A written evaluation of each client's initial situation is provided to the client, generally in the form of a net worth statement. Periodic reviews may be conducted to communicate reminders of the specific courses of action that need to be taken.

Other professionals (e.g., lawyers, accountants, insurance agents, etc.) may be engaged directly by the client on an as-needed basis. Conflicts of interest will be disclosed to the client in the unlikely event they should occur.

An initial meeting, which may be by telephone, is free of charge and is considered an exploratory interview to determine the extent to which financial planning and investment management may be beneficial to the client.

Principal Owner

Michael Pace is the sole owner of MICHAEL PACE, CFP®.

Types of Advisory Services

MICHAEL PACE, CFP® offers investment supervisory services, also known as asset management services. He offers investment advice through consultations, and on more than an occasional basis, MICHAEL PACE, CFP® offers advice to clients on matters not involving securities, such as education planning matters, taxation issues, and estate planning issues.

As of December 31, 2016, MICHAEL PACE, CFP® manages approximately \$35 million in assets for 32 clients. Approximately \$34.6 million is managed on a discretionary basis, and \$380,000 is managed on a non-discretionary basis.

Tailored Relationships

The goals and objectives for each client are identified in meetings with clients. For Investment Management clients, Investment Policy Statements are created that reflect the stated goals and objective. Clients may impose restrictions on investing in certain securities or types of securities.

Agreements may not be assigned without client consent.

Types of Agreements

The following agreements define the typical client relationships.

Financial Planning Agreement

A financial plan is designed to help the client with all aspects of financial planning without ongoing investment management.

The financial plan may include, but is not limited to: a net worth statement; a cash flow statement (aka, a budget); a review of investment accounts, including reviewing asset allocation and offering repositioning recommendations; strategic tax planning; a review of retirement accounts and plans including recommendations; a review of insurance policies and recommendations for changes, if necessary; one or more retirement scenarios; estate planning review and recommendations; and education planning with funding recommendations.

Detailed investment advice and specific recommendations may be offered as part of a financial plan. Implementation of the recommendations is at the discretion of the client.

The fee for a financial plan is typically estimated based upon the facts known at the start of the engagement. The fee range for a financial plan is usually between \$1,000 and \$2,500. The fee is based upon an hourly billing rate of \$200, and is generally not negotiable.

In the event that the client's financial planning needs are substantially different than understood at the initial meeting(s), more time than initially estimated may be needed to complete the planning process. For example, some clients may wish to evaluate a variety of future scenarios, which takes additional time, and thus may involve more planning time and cost.

After delivery of a financial plan, future face-to-face meetings may be scheduled at the client's preference. Follow up planning is also billed at the rate of \$200 per hour.

Investment Management Agreement

Some clients may choose to have MICHAEL PACE, CFP® manage their investment assets in order to obtain ongoing advice and life planning. All aspects of the client's financial affairs are generally reviewed. Realistic goals and objectives are set and steps to reach those goals are identified. As goals and objectives change over time, suggestions are made and implemented on an ongoing basis.

The scope of work and fees for an Investment Management Agreement is provided to the client in writing prior to the start of the relationship. An Investment Management Agreement includes: cash flow management; insurance review; investment management (including periodic performance reporting); education planning; retirement planning; estate planning; and tax preparation, as well as the implementation of recommendations within each area.

The investment management fee charged is nominally 1% per year applied against the investment portfolio, and is billed quarterly.

A minimum charge of \$6,000 per year applies (\$1,500 per quarter). The minimum annual fee equates to an investment portfolio of approximately \$600,000.

Current client relationships may exist where the fees are higher or lower than the fee schedule above. The level of annual fees is negotiable.

Although the Investment Management Agreement is an ongoing agreement and constant adjustments are required, the length of service to the client is at the client's discretion. The client or the investment manager may terminate an Agreement at any time by written notice to the other party. At termination, fees will be billed on a pro rata basis for the portion of the quarter completed. The portfolio value at the completion of the prior full billing quarter is used as the basis for the fee computation, adjusted for the number of days during the billing quarter prior to termination.

Income tax preparation work is typically performed as a part of the Investment Management Agreement. Eligible federal and applicable state income tax returns are filed electronically without an additional fee. If income tax preparation work is not performed for an investment management client, the client's investment management fee can be adjusted to reflect income tax preparation costs.

Retainer Fee Arrangement

In some circumstances, a Retainer Fee arrangement may be used in lieu of fee is based on a percentage of the investable assets. The retainer fee is based on the complexity of a client's specific circumstances and Net Worth, and set at a fixed amount per year. The level of annual fees is negotiable.

Limited Investment Management Agreement

A Limited Investment Management Agreement may be executed when comprehensive financial planning is not received as part of the relationship. The annual fee for a Limited Investment Management Agreement is negotiable.

Hourly Planning Engagements

MICHAEL PACE, CFP® offers hourly planning services for clients who wish to receive advice on a limited scope of work. The hourly rate for limited scope engagements is \$200.

Asset Management

Assets are invested primarily in mutual funds and exchange-traded funds (ETFs). Mutual fund and ETF companies charge each fund shareholder an investment management fee that is disclosed in the fund prospectus. Brokerages may charge a transaction fee for the purchase of some funds.

Stocks and bonds may be purchased or sold through a brokerage account when appropriate. The brokerage firm typically charges a fee for stock and bond trades. MICHAEL PACE, CFP® does not receive any compensation, in any form, from fund companies or brokerage firms.

Investments may also include: equities (stocks), warrants, corporate debt securities, commercial paper, certificates of deposit, municipal securities, investment company securities, U.S. government securities, options contracts, futures contracts, real estate investment trusts and interests in partnerships and LLCs.

Initial public offerings (IPOs) are not available through MICHAEL PACE, CFP®.

Termination of Agreement

A Client may terminate any of the aforementioned agreements at any time by notifying MICHAEL PACE, CFP® in writing and paying the rate for the time spent on the investment advisory engagement prior to notification of termination.

MICHAEL PACE, CFP® may terminate any of the aforementioned agreements at any time by notifying the client in writing.

Fees and Compensation

Description

MICHAEL PACE, CFP® generally bases his fees on a percentage of assets under management.

Some *Retainer Agreements* may be priced based on the complexity of work, especially when asset management is not the most significant part of the relationship.

Fees for financial plans are derived according to the degree of complexity associated with the client's situation and the amount of time a plan takes to develop.

Fee Billing

Investment management fees are billed quarterly, in arrears, meaning that clients are invoiced after the three-month billing period has ended. Payment in full is expected upon invoice presentation. Fees are typically deducted from a designated client account to facilitate payment. The client must consent in advance to direct debiting of her/his investment account.

Fees for financial plans or hourly consultations are billed upon completion, with the fee due upon billing.

Other Fees

Custodians may charge transaction fees on purchases or sales of certain mutual funds and exchange-traded funds. These transaction charges are usually small and incidental to the purchase or sale of a security. The selection of the security is more important than the nominal fee that the custodian charges to buy or sell the security.

MICHAEL PACE, CFP®, in his sole discretion, may waive his minimum fee and/or charge a lesser investment advisory fee based upon certain criteria (e.g., historical relationship, type of assets involved, anticipated future earning capacity, anticipated future additional assets, dollar amounts of assets to be managed, related accounts, account composition, negotiations with clients, etc.).

Expense Ratios

Mutual funds and Exchange-Traded Funds generally charge a management fee for their services as investment managers. The fund management fee is called the expense ratio. For example, an expense ratio of 0.50 means that the mutual fund company charges 0.5% for their services. These fees are in addition to the fees paid by clients to MICHAEL PACE, CFP®.

Performance figures quoted by mutual fund companies in various publications and websites are after their fees have been deducted, so are the net investment returns an investor receives.

Past Due Accounts and Termination of Agreement

MICHAEL PACE, CFP® reserves the right to stop work on any account that is more than 30 days overdue. In addition, MICHAEL PACE, CFP® reserves the right to terminate any financial planning engagement where a client has willfully concealed or has refused to provide pertinent information about financial situations when necessary and appropriate, in MICHAEL PACE, CFP®'s judgment, to providing proper financial advice.

Performance-Based Fees

Sharing of Capital Gains

Fees are not based on a share of the capital gains or capital appreciation of managed securities.

MICHAEL PACE, CFP® does not use a performance-based fee structure because of the potential conflict of interest. Performance-based compensation may create an incentive for the adviser to recommend an investment that may carry a higher degree of risk to the client.

Types of Clients

Description

MICHAEL PACE, CFP® generally provides investment advice to individual clients and families. Client relationships vary in scope and length of service.

Account Minimums

There is a minimum investment management fee of \$6,000 per year. At a nominal 1% investment management fee, this equates to an investment portfolio of approximately \$600,000. MICHAEL PACE, CFP® has the discretion to waive the account minimum.

Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis

Security analysis methods may include charting, fundamental analysis, technical analysis, and cyclical analysis.

The main sources of information include financial newspapers and magazines, inspections of corporate activities, research materials prepared by others, corporate rating services, timing services, annual reports, prospectuses, filings with the Securities and Exchange Commission, and company press releases.

Other sources of information that MICHAEL PACE, CFP® may use include Charles Schwab & Company's services, Advisor Intelligence, and websites found on the World Wide Web.

Investment Strategies

The investment strategy for a specific client is based upon the goals and objectives identified by the client during consultations. The client may change these goals and objectives at any time. Each Investment Management client executes an Investment Policy Statement that documents their goals and objectives and their preferred investment strategy.

Other strategies may include long-term purchases, short-term purchases, trading, short sales, margin transactions, and option writing (including covered options, uncovered options or spreading strategies).

Risk of Loss

All investment programs have certain risks that are borne by the investor. Our investment approach constantly keeps the risk of loss in mind. Investors face the following investment risks:

- **Interest-rate Risk:** Fluctuations in interest rates may cause investment prices to fluctuate. For example, when interest rates rise, yields on existing bonds become less attractive, causing their market values to decline.
- **Market Risk:** The price of a security, bond, or mutual fund may drop in reaction to tangible and intangible events and conditions. This type of risk is caused by external factors independent of a security's particular underlying circumstances. For example, political, economic and social conditions may trigger market events.
- **Inflation Risk:** When any type of inflation is present, a dollar today will not buy as much as a dollar next year, because purchasing power is eroding at the rate of inflation.
- **Currency Risk:** International investments are subject to fluctuations in the value of the dollar against the currency of the investment's originating country. This is also referred to as exchange rate risk.
- **Reinvestment Risk:** This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e., interest rate). This primarily relates to fixed income securities.
- **Business Risk:** These risks are associated with a particular industry or a particular company within an industry. For example, oil-drilling companies depend on finding oil and then refining it, a lengthy process, before they can generate a profit. They carry a higher risk of profitability than an electric company, which generates its income from a steady stream of customers who buy electricity no matter what the economic environment is like.
- **Liquidity Risk:** Liquidity is the ability to readily convert an investment into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not.
- **Financial Risk:** Excessive borrowing to finance a business' operations increases the risk of profitability, because the company must meet the terms of its obligations in good times and bad. During periods of financial stress, the inability to meet loan obligations may result in bankruptcy and/or a declining market value.
